

RAGHAVENDRA GABBUR

Python Full Stack Developer

+91-8861455144 • Raghu.gabbur27@gmail.com • Bengaluru, Karnataka • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building and maintaining scalable web and mobile applications using React.js, Next.js, React Native, Python, and Django REST Framework. Experienced in developing REST APIs, implementing authentication and authorization, optimizing application performance with Redis caching, building real-time features using WebSockets, and deploying containerized applications with Docker. Strong understanding of database design, API integration, Agile development practices, and AI-assisted development workflows.

TECHNICAL SKILLS

Frontend: React.js, Next.js, React Native, TypeScript, JavaScript (ES6+), Tailwind CSS, Shadcn/UI, HTML5, CSS3

Backend: Python, Django, Django REST Framework, Django Channels, REST API Design

Databases: PostgreSQL, MySQL, CockroachDB, Redis

Auth & Security: JWT, Role-Based Access Control (RBAC), OAuth 2.0

Tools & Cloud: Docker, Git, GitHub, Firebase (FCM, Auth), Cloudinary, GCP, Postman, VS Code

PROFESSIONAL EXPERIENCE

Gowdanar Technosoft Pvt Ltd (GTPL) — Bengaluru

Full Stack Software Engineer | Jun 2024 – Present

- Owned end-to-end feature delivery for web and mobile applications using Next.js, React Native, Python, and Django REST Framework across the full software development lifecycle (**SDLC**).
- Designed and built 20+ REST APIs supporting onboarding, user management, document verification, and workflow automation modules used in production.
- Implemented **JWT-based authentication and Role-Based Access Control (RBAC)** to secure access across Admin, Operations, and Verifier roles.
- Improved application performance through **Redis caching**, reducing API response times and minimizing database load for high-traffic workflows.
- Integrated **Firebase Cloud Messaging (FCM)** for real-time push notifications and implemented Google and Apple OAuth authentication flows.
- Containerized backend services with Docker; contributed to CI/CD pipelines and production deployment activities.
- Collaborated with frontend, QA, and product teams in Agile sprints, consistently delivering production-ready features on schedule.

Gowdanar Technosoft Pvt Ltd (GTPL) — Bengaluru

Software Engineer Intern | Dec 2023 – May 2024

- Developed REST API endpoints using Django REST Framework and integrated them into React.js frontend applications.
- Built responsive UI components and reusable frontend modules following design specs.
- Conducted API testing and validation using Postman; participated in code reviews and debugging sessions.
- Promoted to full-time Software Engineer role within 6 months based on technical contributions and project performance.

PROJECTS

Digital Lending & Loan Lifecycle Management Platform

Django REST Framework · Next.js · TypeScript · CockroachDB · Redis · Tailwind CSS · Docker

- Built a digital lending platform supporting borrower onboarding, loan processing, document submission, and fund disbursement workflows.
- Owned REST API design and database schema for loan lifecycle, accounts, and transaction modules.
- Built multi-step onboarding forms, document upload modules, validation workflows, and approval processes.
- Built responsive dashboard and workflow interfaces using Next.js, Tailwind CSS.

Healthcare Appointment & Therapy Management Platform

React Native · Next.js · Django Channels · WebSockets · Firebase · CockroachDB · Google Maps API

- Developed a cross-platform mobile app for appointment scheduling, user onboarding, and appointment management.
- Built real-time booking updates and live status tracking using WebSocket-driven architecture via Django Channels.
- Implemented location-based center discovery and navigation using Google Maps API.
- Integrated Firebase push notifications and secure Google/Apple OAuth sign-in for seamless authentication.

EDUCATION

B.E. in Electronics & Communication Engineering

Basaveshwar Engineering College, Bagalkot

2018 – 2022
