PROFESSIONAL SUMMARY

Full Stack Software Developer with 2+ years of experience contributing to scalable web and mobile applications across fintech and enterprise environments. Proficient in React.js, Next.js, React Native, Python, and Django REST Framework, with expertise in RESTful API design, microservices architecture, JWT authentication, role-based access control (RBAC), and responsive UI development. Skilled in Redis caching, database optimization, and cross-platform mobile development, with hands-on experience delivering cloud-native solutions using Docker, Google Cloud Platform (GCP), and Firebase in Agile delivery environments.

TECHNICAL SKILLS

Frontend:	React.js, Next.js, React Native, JavaScript ES6+, TypeScript, HTML5, CSS3, Tailwind CSS
Backend:	Python, Django, Django REST Framework, RESTful API Design
Databases:	MySQL, PostgreSQL, CockroachDB, SQL
Tools & DevOps:	Git, GitHub, Docker, Firebase, Postman, VS Code, Figma, GCP, Shadcn/UI
Integrations:	Google Maps API, Razorpay, WebSockets, Apache Kafka, Google/Apple Sign-In
Concepts:	JWT Auth, RBAC, CRUD, CI/CD, Agile/Scrum, Performance Optimization, Responsive Web Design

PROFESSIONAL EXPERIENCE

Gowdananar Technosoft Pvt Ltd (GTPL), Bangalore

Software Developer

Jun 2024 – Present

- Developed and enhanced scalable enterprise-grade web and mobile applications using Python, Django, React Native, Next.js, and RESTful APIs.
- Built reusable, responsive frontend interfaces using React Native, Next.js, Tailwind CSS, and TypeScript, ensuring seamless frontend and backend communication via RESTful API integrations.
- Designed and developed high-performance REST APIs supporting payment gateway workflows, transaction management, notification services, and real-time application features.
- Designed and implemented secure backend services with JWT authentication, role-based authorization, and API security mechanisms, improving application integrity and system reliability.
- Designed scalable database architectures in PostgreSQL, MySQL, and CockroachDB, improving query execution performance and supporting large-scale transactional workloads.
- Integrated third-party services including Google Maps API, Firebase for push notifications, and Razorpay with Google/Apple Sign-In for secure payment and authentication workflows.
- Containerized applications with Docker, deployed on GCP, implemented Redis caching to reduce API latency on high-traffic endpoints.
- Participated across the full Software Development Life Cycle (SDLC) including requirement analysis, architecture design, development, testing, deployment, debugging, and production support.
- Contributed to CI/CD pipelines, application monitoring, and performance optimization while adhering to coding standards and engineering best practices.
- Collaborated on development workflows using Git and GitHub for version control, branch management, and code reviews, while resolving API and frontend issues through Postman and DevTools.

Software Developer Intern

Dec 2023 – May 2024

- Contributed to the development of fintech web applications using Django and Next.js in a collaborative development environment.
- Designed and tested RESTful API endpoints using Django REST Framework, enabling reliable frontend-backend integration across core application workflows.
- Developed responsive UI components using React.js and Next.js, improving layout consistency and ensuring a consistent user experience across devices.
- Performed API integration, debugging, and testing using Postman and browser DevTools to support ongoing feature development.
- Collaborated with team members using Git and GitHub workflows while participating in Agile sprint discussions and development activities.

EDUCATION

B.E. in Electronics & Communication Engineering

2018 – 2022

Basaveshwar Engineering College, Bagalkot
