SUMMARY

Full Stack Developer with 2+ years of experience building scalable web and mobile applications using React.js, Next.js, React Native, Python, and Django REST Framework. Experienced in REST API design, JWT/RBAC authentication, Redis performance optimization, real-time systems with WebSockets, Docker-based deployments, and CI/CD workflows. Familiar with AI-assisted development practices using GitHub Copilot and ChatGPT.

TECHNICAL SKILLS

Frontend	React.js, Next.js, React Native, TypeScript, JS (ES6+), Tailwind CSS	Backend	Python, Django, Django REST Framework, Django Channels, REST API Design
Databases	PostgreSQL, MySQL, CockroachDB, Redis, Query Optimization	Auth & Security	JWT, RBAC, OAuth, Google Sign-In, Apple Sign-In
Real-Time	WebSockets, Django Channels, Firebase Cloud Messaging	DevOps & Cloud	Docker, Git, GitHub Actions, GCP, Linux, CI/CD
AI & Productivity	GitHub Copilot, Prompt Engineering, AI-assisted Development	Practices	Agile/Scrum, Code Review, API Optimization, Cross-team Collaboration

PROFESSIONAL EXPERIENCE

Software Developer • [Gowdanar Technosoft Pvt Ltd \(GTPL\)](#) Jun 2024 – Present
Bangalore, Karnataka

- Built production-grade web and mobile apps using Next.js, React Native, Django, and Django REST Framework; delivered 20+ RESTful APIs for onboarding, automation, and notifications — secured with JWT and RBAC.
- Reduced API response times by ~60% via Redis caching; designed Redis-backed concurrency mechanisms to prevent race conditions under high-traffic concurrent user actions.
- Implemented real-time workflows using Django Channels and WebSockets for live booking updates and status synchronization; integrated Firebase Cloud Messaging for push notifications.
- Optimized PostgreSQL, MySQL, and CockroachDB schemas; containerized services with Docker and supported GCP deployments and CI/CD pipelines.
- Leveraged GitHub Copilot and AI-assisted development practices to accelerate delivery; collaborated across QA, frontend, and backend teams in Agile sprint cycles.

Software Developer Intern • [Gowdanar Technosoft Pvt Ltd \(GTPL\)](#) Dec 2023 – May 2024
Bangalore, Karnataka

- Built 10+ REST API endpoints and responsive React.js UI components in a 5-member Agile team; debugged via Postman and DevTools, managed code through Git/GitHub PR workflows.
- Promoted to full-time Software Developer based on delivery quality, ownership, and consistent performance.

PROJECTS

Digital Wallet & Workflow Management Platform · *Next.js · Django REST Framework · PostgreSQL · Redis · Docker*

- Owned API design, DB schema, and frontend UI for wallet management and workflow automation modules; applied Redis caching and locking to optimize throughput and prevent concurrent conflicts.

Real-Time Booking & Tracking System · *React Native · Django Channels · WebSockets · Firebase · Google Maps API*

- Built cross-platform booking and live-tracking app with WebSocket-driven status updates, Redis slot reservation, Firebase push notifications, and Google/Apple OAuth sign-in.

Enterprise Operations Dashboard · *Next.js · Tailwind CSS · Shadcn/UI · Django REST Framework · RBAC*

- Developed multi-role admin dashboard with RBAC, multi-step form validation, file upload handling, and Agile-delivered backend API integration for document verification and approval workflows.

EDUCATION

B.E. in Electronics & Communication Engineering — *Basaveshwar Engineering College, Bagalkot* 2018 – 2022
